

## **ELEPHANT TOOTHPASTE**

### **Materials (all ingredients found in supermarket):**

Safety Glasses

Gloves

2 Tablespoons Warm Water

1 Teaspoon Yeast

½ cup Hydrogen Peroxide (3% or 6%)

Squirt of Dishwashing Liquid

Food Colouring

Empty Bottle

Funnel

Tray to catch overflow if inside!

### **Instructions:**

Pour hydrogen peroxide into the empty bottle

Add a few drops of food colouring

Add the dishwashing liquid to this mixture

Then in a separate container combine water and yeast and mix until dissolved.

Pour the mixture of yeast and water into the bottle, stand back and watch what happens.

Note: the foam is safe to touch because it is soap, water and oxygen and be sure to feel the temperature of the bottle.
