

GALAXY JAR

Materials:

Glass Jar

Cotton Wool Balls

Glitter – variety of favourite colours, stars

Acrylic Paints (3-4 colours)

Blackboard label or cardboard

Containers to mix paint

Water

Mixing stick

Instructions:

Put paint into separate containers.

Mix water into each container (enough of each colour to end up filling jar. Add more paint for brightness)

Fill bottom of jar with spread out cotton wool (if you have 4 colours then fill about $\frac{1}{4}$ of jar for first paint colour)

Add a good sprinkle of glitter and stars

Pour first colour into jar slowly to how much you want that colour to be in the jar. Gently swirl around a little but don't shake it.

Next, add the next layer of cotton wool. Then repeat with glitter and paint.

Continue with another layer of cotton wool, glitter, paint until all colours used and bottle is full.

At the end you can stir slightly to mix colours, and create an amazing looking galaxy!

Finish by tying a label around the top of the jar or sticking it on with your favourite quote.
